(a) common verification capacity
bottom/top quintile = 1.37
pointwise EV/y non-increasing: no
losers = 0%
(b) verification rises with income
bottom/top quintile = 0.24
pointwise EV/y non-increasing: no
losers = 0%
(c) (b) + overconfidence at low v
bottom/top quintile = -0.09
pointwise EV/y non-increasing: no
losers = 8%
(d) (c) + default intermediated verification
bottom/top quintile = 2.53
pointwise EV/y non-increasing: yes
losers = 0%
gain from AI / income (EV/y)
