(a) Baseline joint economy
total Γ/y (C1-C5 hold)
consumer part
factor-income part
gain / income
income percentile
(b) One condition fails at a time
C1 fails
C2 fails
C3 fails (autonomy)
C3 fails (C(D⁰) ≥ s_min)
C3 fails (z(y) decreasing)
C4 fails
Γ/y (scaled to max |Γ/y| = 1)
income percentile
